2-Port USB KVM Switch

Product Overview

The LevelOne KVM-0223 is an easy to use 2-port USB interface KVM switch for connecting 2 multi-platform operating system computers to a single keyboard, mouse and monitor. It also allows users to connect audio from the connected computers to a single audio system.

Multi-Platform Use

The KVM-0223 supports multi-platform computer systems, enabling users to connect MAC and PC platform computers to a single console. With easy hot-key swap selection between computers, users can operate both systems simultaneously.

All cables needed are already connected to the KVM switch. Users can connect the USB KVM without any need for additional software installation or system configuration. Also, the KVM-0223 requires no power to operate.

High Quality Audio/Video Support

The 2-port KVM-0223 supports DDC2B and VGA resolutions of up to 2048 x 1536 pixels. The switch also incorporates audio support, allowing users to connect audio channels of both systems to a single audio system.
